

INTEGRATED MANAGEMENT POLICY

QUALITY, SAFETY, ENVIRONMENT AND HEALTH.

WEB Nordeste is an Industrial Organization dedicated to the design, manufacture, services and repair of oil and gas equipment under API 6A, 16A and 17D licenses.

Carrying out all its activities under international standard certifications such as API Q1 and ISO 9001. The fundamental objective is to maintain and increase its participation in providing solutions for the petroleum industry, adding value to the local industry with quality products and services based on needs of our customers.

In achieving this objective, we commit to:

- ✓ Provide quality equipment and services that meet the demands of our Customers and the legal and regulatory requirements of our area;
- ✓ Maintain close contact with our Customers, with the aim of identifying and understanding their needs, continually seeking to increase their satisfaction;
- ✓ Commit to the continuous improvement of our Quality Management System, through the permanent improvement of our products, services and processes;;
- ✓ Maintain an adequate selection of Suppliers that meet our organization's quality requirements in their products and services, to guarantee these quality standards throughout our supply chain, as well as compliance with delivery deadlines;
- ✓ Train, raise awareness and motivate all our employees in understanding and implementing the requirements of the integrated management system, as well as supporting the growth and improvement of employees' skills in different areas of work;
- ✓ Protect interested parties in relation to health and safety at work, and;
- ✓ Protect the environment from aspects arising from manufacturing operations.

This Policy is communicated, understood, implemented and maintained at all levels and functions of the organization.
